

Natasha Levkovich

Natasha Levkovich CV

About me

Brief

- Full name : Natasha Levkovich
- Job title : Senior Java/Kotlin Software Engineer
- Area of interest : Accepting interesting offers. Got huge technical experience in Java, Kotlin, can also manage teams (technical decisions, time estimations, people management)
- LinkedIn profile : <https://www.linkedin.com/in/natasha-levkovich-a6049875>
- Bitbucket profile : https://bitbucket.org/nat_levkovich
- Github profile : <https://github.com/kotlin13>

Contact information

- Phone : 4915204125374
- Email : natasha.ml.lev1993@gmail.com
- Website : <http://natasha.gburanov.me>
- Country : Germany
- Address : Kreuzkellerweg 12, 88239 Wangen im Allgäu
- Birthdate : 08.09.1993
- Nationality : Belarusian. I have blue card
- Hobby : Psychology, politics, running, playing balalaika, hiking, snowboarding

Summary

I work as Java/Kotlin software backend developer

I also use Python mostly for data science related things.

I got experience managing teams (3-7 people). Technical decisions, Time estimations, People management.

I like microservice approach and try to use it, if it's possible

I do care about infrastructure and familiar with Docker, Kubernetes, Ansible...

I think microservice architecture need proper monitoring and I can do it (Prometheus, etc..)

I think data and how you organize it is more important than code in many scenarios

Knowledge of agile methodologies (Scrum)

Learning new things is my passion

Working experience in two countries with different cultures - Belarus and Germany

Ability to create, understand and implement design specifications. Ability to solve complicated problems.

Ability to quickly understand a new code and start contributing without significant delay.

Working with huge amount of legacy code.

Ability to work in a team. Wide experience in using collaborative software; repositories, bug tracking systems, review systems.

Wide use of automated testing (unit tests, functional tests, integration tests). Unit testing of legacy code.

Career History

Gamigo : May 2020 - Now

Senior Software Developer (Java) : Berlin, DE(Remote now from Wangen im Allgäu)

Responsibilities:

- Senior Backend Developer for different game platforms
- Leading various projects around account policies, security, platform, finance methods integration(paypal, ...), bonus programs, etc
- Guiding new people
- Solving problems

Applift : Dec 2019 - May 2020

Senior Software Developer (Java/Kotlin/Python) : Berlin, DE

Responsibilities:

- Senior Backend Developer for advertisements
 - Gamigo has bought Applift
-

Wargaming : Dec 2017 - Nov 2019

Kotlin/Java Software Engineer : Minsk, Belarus

Responsibilities:

- Lead for the CMDBuild(Infrastructure project)
 - Monitoring project for the microservice architecture - increased the stability of the system a lot
 - CI integration for many microservices (Docker, Jenkins)
 - Increased the test coverage of Kotlin/Java projects
 - integration of Data Science team with Developers
-

Codeworks/Ifuture(Panbet Ltd) : Jun 2015 - Nov 2017

Java Software Engineer : Minsk, Belarus

Responsibilities:

- Lots of communication with Saint-Petersburg office
 - Project Marathonbet (sport betting + casino, 2k ppm).
 - integration of several external partners in the system
-

Logic Way : Jun 2014 - May 2015

Java Software Engineer : Minsk, Belarus

Responsibilities:

- DKBM project.
 - The system was built by my team from scratch and it is intended to control the lifecycle of policies\losses for obligatory insurance of a civil liability of vehicle owners (OSAGO)
-

Ispirer : Dec 2013 - May 2014

Java Software Engineer : Minsk, Belarus

Responsibilities:

- Migration projects(Database and applications(example, written on Progress4GL,COBOL,C#))
-

Languages

Languages

- Russian : Native
- English : Upper Intermediate
- German : Intermediate (B2)

Language certificates

- English : IELTS certificate 7.0 total

Education

Belarusian State University of Informatics and Radioelectronic : Sep 2010 - Aug 2015

: Minsk, Belarus

Belarusian State University : Sep 2015 - May 2016

Master's degree of mathematics and information technologies :
Minsk, Belarus

Additional Trainings

<https://www.coursera.org/learn/project-planning/home/welcome> :
Jan 2017 - March 2017

Initiating and Planning Projects : Online

<https://www.coursera.org/learn/schedule-projects/home/welcome> :
May 2017 - Aug 2017

Budgeting and Scheduling Projects : Online

<https://www.coursera.org/learn/project-risk-management/home/welcome> :
Sep 2017 - Nov 2017

Managing Project Risks and Changes : Online

Online Berkeley course <https://class.coursera.org/saas> : Jan 2012 - Apr 2012

Software as a service (SAAS) : Online

Online Stanford course <https://class.coursera.org/gametheory-2012-002/class> : Jan 2013 - Feb 2013

Game theory : Online

Online Princeton course <https://class.coursera.org/algs4partI-002/class> : Feb 2013 - Mar 2013

Algorithms : Online

Online Princeton course <https://class.coursera.org/algs4partII-001/class/index> : Apr 2013 - May 2013

Algorithms part 2 : Online

Skills

Programming Languages

Wide experience (more than 9 years):

Java

Moderate experience (from 3years):

Kotlin

Learning now:

Scala

Basic experience:

C# , Python

Big data**Solutions:**

Spark , Hadoop

Monitoring:

Prometheus

Infrastructure**CI:**

CircleCI , Jenkins , Buddy

IaC:

Puppet , Ansible

Deploy:

Docker , Kubernetes

Collaboration tools**Repositories:**

Git (including Github)

Messengers:

Microsoft Teams , Slack

Web-based repositories:

Github/Gitlab , Bitbucket

Bug tracking systems:

Jira , Redmine

Code review systems:

Code collaborator , Github/Gitlab pull requests

Full stack solutions:

Atlassian stack (Jira, Bamboo, Stash, Confluence)

Web**Frameworks:**

JSP

Microservices:

Docker , Distributed messaging , CI , Small teams

OS stack technologies**Moderate experience:**

Multi-threading

Testing tools**Unit testing:**

jUnit , Mockito

Automated testing:

Selenium
